4th International Disaster and Risk Conference IDRC Davos 2012

Integrative Risk Management in a Changing World

26-30 August 2012 Davos, Switzerland

2nd Announcement Programme, Topics & Exhibition

Global Risk Forum

"From Thoughts to Action" by closely linking practice, science, policy and decision making in the search for sustainable solutions.

"IDRC is a great opportunity to increase knowledge and to share experiences"
Fust, Walter
Former General Director Swiss Agency for Development and Cooperation (SDC)

Chairman's Statement

Dr Walter Ammann, President GRF Davos

For the fourth time since 2006, the International Disaster and Risk Conference is back in Davos, Switzerland. This biennial gathering of global leading risk and disaster experts builds on the strength of its previous events, and features a broad scope of topics, stakeholders and partners.

With the large number of government officials, experts and practitioners, representatives from International Organisations, Non-governmental Organisations, the private sector, scientific and academic institutions, the media, and other high-level personalities from all over the globe, the conference provides a valuable platform for the world's risk and disaster management community. A vital mix of session formats, workshops and teaching courses enables a profound exchange of science, policy, and practice.

IDRC Davos 2012 will take place from 26 August to 30 August 2012 and will again take an integrative, multidisciplinary approach, when addressing the different kinds of risks affecting society today; risks which might be far beyond any particular stakeholder's capacity to control. Risks that may adversely affect multiple parties across geographic borders, sectors and industries.

A successful conference relies on the valued support provided by partners and exhibitors. I cordially invite you to participate in this exciting, productive and insightful meeting.

16. Amman

Dr Walter Ammann, President and CEO Global Risk Forum GRF Davos Chairman IDRC Davos 2012

What is IDRC?

IDRC - The Risk Interface

International Disaster and Risk Conferences and workshops (IDRC) are the ideal platform for assessment and dissemination activities, and in particular for networking activities. IDRC is the interface for experts, practitioners and institutions from science, technology, business, politics, and civil society to create transparency and encourage synergies to reduce and manage risks worldwide.

IDRC attempts to find solutions to today's challenges in managing risks, reducing disasters and adapting to climate change. It helps build stronger ties with adequate public-private partnership models among risk management communities and sectors, enabling a move towards a truly integrative way of thinking about disasters and risks.

Organised by the Global Risk Forum GRF Davos, IDRC Davos, established in 2006, is a biennial global gathering in Davos, Switzerland. IDRC Davos attracts an average of 1000 participants from 100 countries. Between IDRC Davos, regional IDRCs are held: in 2007 the IDRC Harbin, China and in 2009 the IDRC Chengdu, China.

strategies, models and solutions in Integrative Risk Management

Why IDRC?

IDRC Davos helps bridge the gap in problem solving between the causes of problems governance, and technology.

Today's societies are faced with numerous interconnected, complex and newly emerging risks. Environmental, technical, social and economic risks are often closely linked and can result in successive impact. For example the recent earthquake in Japan, resulted in a disastrous tsunami, creating nuclear meltdown at its key facilities. Risks and disasters explored at the IDRC include, amongst others, natural hazards, failures of critical infrastructure and services, pandemics, acts of terrorism and financial crises. All can severely impact and influence human beings and collective societies.

IDRC brings practice, science, policy and decision making together to find for sustainable solutions. It promotes the "integrative risk management approach" as a process; a systematic framework for risk analysis and assessment procedures. The outcome leads to consistent decisions and an optimised, integrative planning of measures. We believe risk reduction should be seen as an holistic approach, with safety, security and sustainable development at its core – an approach that counts on public-private-partnership.

Integrative Risk Management

How to cope with the broad array of risks and disasters society is facing today?

A multi-sectors, -stakeholders and multidisciplines approach is needed to assess, reduce risks and manage risks or disasters at all levels. Inter- and trans- disciplinarity is essential.

The multi- measures approach along the risk cycle in Integrative Risk Management

Integrative risk reduction and disaster management implies vulnerability reduction and resilience increase. A multi-measures approach along the risk cycle including prevention, intervention and recovery is required.

"IDRC 2010 provided an excellent opportunity to encourage and mobilize the global community to step forward 'From Thoughts to Action'"

Zeppos John

Member of the International Association of Emergency Managers, NATO
CCPC Expert on Operational Capability, Greece

IDRC Davos 2012 Themes and Topics

Establishing and Developing Integrative Risk Management

The complex and multi- faceted nature of risks demands an innovative, holistic and problem oriented approach to risk reduction and disaster management.

IDRC Davos 2012 will address the Integrative Risk Management Approach within the context of cross cutting themes, risk areas and instruments such as:

Cross-Cutting Themes Building Sender / Inequality Economics / Finance nternational Agendas (HFA, MDGs, RIO +20) Resilience / Vulnerability Mega Catastrophes / Cascading Effects Technical, Financial, Country Risk Management **Ecological &** Management **Tools** Environmental / Ecological Risks Governance Technical Risks Communication & Outreach Urban Risks / Megacities **Education &** Research Societal / Political Risks Health Impacts & Medical Responses

Conference Structure & Format

The IDRC Davos 2012 programme enables active knowledge sharing, helping to drive good practice and build capacity. Social events and exhibitions also offer the opportunity to discuss ideas, foster partnerships and strengthen professional and personal networks.

Preliminary overview of the IDRC Davos 2012 Conference programme structure:

"IDRC Davos is an excellent forum where ideas, concerns, challenges and opportunities can be discussed, shared and implementable actions developed."

Shah, Haresh C.,

Professor of Engineering, Emeritus, Stanford University, Founder and Senior Advisor Risk Management Solutions, Inc., Stanford, USA

Plenary Sessions

The plenary sessions of IDRC Davos 2012 will provide participants with presentations, discussions, solutions and ideas from international experts representing the private sector, governmental bodies, UN Institutions, research and practitioners. Respecting the Integrative Perspective of Risk Management, each plenary session aims at providing an overview from each stakeholder and always focussing on all parts of the risk cycle, covering prevention, intervention and recovery.

Parallel Sessions, Poster Sessions and Workshops

Input papers submitted and reviewed by a Scientific and Technical Advisory Board to the IDRC, will be assembled to parallel sessions and poster sessions which aim to support the plenary sessions and the overall foci of the conference. The sessions will be designed to foster debate and interaction amongst the participants and focus on the key questions of the IDRC Davos 2012. Other side events, such as sessions and workshops organised by external stakeholders, will also provide companies, institutions and organisations the opportunity to discuss their foci with the interested audience of IDRC Davos 2012.

Pre- and Post-Conferences, Meetings and Workshops

Organisations and Companies will have the chance to organise a conference workshop or meeting before and after the IDRC Davos 2012. GRF Davos will provide the logistical support where the input will be provided by the organisation or company planning to organise a pre- or post- conference, meeting or workshop.

Exhibition

During IDRC Davos 2012 companies, organisations and institutions will be able to present their work, institution and mission at an exhibition area. IDRC Davos 2012 offers 1'450 m2 of exhibition space in a completely renewed conference centre.

RISK AWARD

Munich Re Foundation, GRF Davos and United Nations Secretariat for the International Strategy for Disaster Reduction (UNISDR) jointly launched the RISK AWARD (www.risk-award. org) at the 3rd Global Platform for Disaster Risk Reduction in 2011. The RISK AWARD offers €100,000 to a risk reduction project that will contribute to increasing people's resilience to disasters, especially in developing communities which are most at risk. The RISK AWARD prize will be awarded every two years at the International Disaster and Risk Conferences in Davos, starting with its first award ceremony at the IDRC Davos 2012.

RISK ACADEMY - Continuous Education

GRF Davos is offering continuous education courses in Risk Management within the frameworks of its Risk Academy. Once again, GRF Davos will offer an education and training course during IDRC Davos 2012 which will provide participants with the opportunity to increase their skills in Risk Management within the frameworks of tailored course(s).

Interactive Conference Programme

IDRC Davos 2012 will once again use innovative and new ways for knowledge exchange and interaction. Video statements and/or presentations by participants will be collected and uploaded to the World Wide Web. Additionally all plenary sessions will be live streamed and recorded as well. The gathered information, knowledge and ideas will be bundled and archived online within an interactive IDRC Dayos 2012 conference programme. This interactive portfolio will be available after the conference to the wider public and provide a sound knowledge platform.

Exhibiting

IDRC Davos 2012 offers about 1'450m² of exhibition space.

Within the IDRC Davos Exhibition Area, companies and organisation have the opportunity to present their products, institution and meet potential job seekers.

In order to maximise the time participants spend in the exhibition area, refreshment points are integrated. The exhibition area is strategically situated, so that participants have to pass by on their way to plenary and parallel sessions.

IDRC Davos Congress Centre Exhibition Area:

Participants Profile

IDRC participants represent a wide variety of practitioners involved in Risk and Disaster Management. They include government officials, experts and practitioners, representatives from IGOs, NGOs, the private sector, from scientific and academic institutions covering natural sciences, social sciences, medical, legal or engineering sciences as well as the media and the public.

Former IDRCs covered participants from various affiliations and nearly every continent on earth.

Olten, Switzerland

IDRC Davos Participants by Affiliation

IDRC Davos Participants by Geographical Region

"It is so valuable to widen the horizon by totally different aspects from so many countries. IDRC is a special chance." Schenk Sieglinde Head of Business Risk Management, Alpiq Management AG,

Organisation - GRF Davos

The IDRC Conferences are organised by the Global Risk Forum GRF Davos

Through its various activities, GRF Davos serves as a centre of knowledge and know-how exchange for the application of timely risk management strategies, tools and practical solutions.

GRF Davos aims at reducing vulnerability and increasing resilience for all types of risks and disasters to protect life, environment, critical infrastructure, property and all means of business for the worldwide community on a sustainable hasis.

GRF Davos addresses global issues on risk reduction, disaster management and global changes through three focal activities that complement each other.
